Bachelor of Ayurvedic Medicine and Surgery (BAMS)

Thousands of years before modern medicine provided scientific evidence for the mind-body connection, the sages of India developed Ayurveda, which continues to be one of the world's most sophisticated and powerful mind-body health systems. More than a mere system of treating illness, Ayurveda is a science of life (Ayur = life, Veda = science or knowledge). It offers a body of wisdom designed to help people stay vibrant and healthy which realizing their full human potential.

The two main guiding principles of Ayurveda are 1.) the mind and the body are inextricably connected, and 2.) nothing has more power to heal and transform the body than the mind. Freedom from illness depends upon expanding our own awareness, bringing it into balance, and then extending that balance to the body.

Operation Theater

Course Curriculum

Bachelor of Ayurvedic Medicine and Surgery (BAMS) is of 5 year & 6 month duration (4 year & 6 month of the main course and 1 year internship).

Admission Eligibility : Any Male or Female, 10+2 (PCB) passed with minimum 50% marks.

Panchkarma

Panchakarma is an Ayurvedic way of cleaning, rejuvenating the body, mind and consciousness. It is known all over the world for its beneficial effects on health. It is a self healing process. It is a unique contribution of Ayurveda. It is a set of five procedure which eliminates toxic elements from the body.

Panchakarma is a therapeutic process which helps in reversing the negative effects of daily life. Negative effects include toxins of the body, which in turn weakens the system and make us susceptible to various specific, chronic, degenerative and non specific diseases.

Panchkarma can restore the natural state of health, being and wellness by cleansing the body full of toxic substances. It helps in bringing balance into the system and improving bodily functions like digestive system and all. It helps you to a great deal in sustaining the process by making positive changes in day to day lifestyle.

The Panchakarma application appears quite simple. However, the effects are powerful and effective. It is a unique, natural, holistic, health-giving series of therapeutic treatments that opens the subtle channels; bring life-enhancing energy thereby increasing vitality, well being, confidence and inner peace.

Harbal Garden

There are 450 types of verdant medicinal plants are presently available in Herbal Garden especially for the purpose of study. A large part of College land is covered by this Herbal Garden.

Lecturer Hall

A lecture hall is a large room used for instruction, unlike a traditional classroom with a capacity about 15 dozen, the capacity of lecture halls is typically measured in the hundreds. Lecture halls have a pitched floor, so that those in the rear are sat higher than those at the front, allowing them to see the lecturer. Sanjeevani Ayurvedic College offers courses exclusively centered on their design..

Lecture hall differ from seminar room in that it allow for little versatility in use, although it is on less flexible than, for example, chemistry laboratories. Experimentation, group work, and other contemporary educational methods are not practicable in a lecture hall. On the other hand, lecture hall is excellent for focusing the attention of a large group on a single point, either an instructor or an audio-visual presentation, and modern lecture hall often feature audio-visual equipment. A microphone and loudspeakers are common to help the lecturer be heard, and projection screens may be used for large displays. The acoustic property of lecture hall has been the subject of numerous international studies, some even antedating the use of electronic amplification.

Library

The main function of the Medical college library is to provide resources and research support for students and faculty of the Medical Course, Specific course-related resources are usually provided by the library, such as copies of textbooks and article readings held on reserve.

Sanjeevani Ayurvedic medical college library offer workshops and courses outside of formal, graded coursework, which are meant to provide students with the tools necessary to succeed in their medical course. These workshops may include help with citations, effective search techniques, journal database, medical. These workshops provide students with skills that can help them achieve success in their health care careers (and often, in their future occupations), which they may not learn inside the classroom.

The academic library provides a quiet study space for students on campus; it may also provide group study space, such as meeting rooms. The library provides a gateway for students and researchers to access various resources, both print/physical and digital. Our institute is subscribing to electronic journals databases, providing research and scholarly writing software, and usually provides computer workstations or computer labs for students to access journals, library search databases and portals, institutional electronic resources, internet access, and course-or task-related software.

Hostel

Sanjeevani Ayurvedic Medical College has Separate Boys & Girls hostels, located in calm and serene surroundings, provide a conducive natural atmosphere for the students to study, The hostels are located away from each other with separate mess facilities. Utmost care is taken to maintain hygiene during preparation and serving of food by dedicated staff.

Canteen

A spacious and hygienic canteen at Institute provides fresh snacks items, tea, coffee, juice drinks & daily need items to students & visitors, food is prepared under the direct supervision of the messing committee comprising of management, faculty and student representatives.

Transport

Sanjeevani Ayurvedic Medical College providing transport facilities for students, faculty and staff from all surrounding town & villages.
